Tip from Steinberg Home Improvements:

In planning your home improvement project, make sure the end result is aesthetically pleasing to you and the completed project is not only functional for you today but many years to come.

Tip from Sunniland Roofing:

Leaky roof? Go into your attic, take a nail (at least 3 to 4 inches long) and pound it straight up through the spot where the water

is entering (it may be 2-3 ft above any watermarks). When you climb up on your roof to do the repair, you will be able to find the spot where the water damage was occurring by looking for the nail. More info at www.sunnilandcorp.com.
