

Mixed Fruit

INGREDIENTS

- 1 large can of pears with light syrup
- 1 large can of peaches with light syrup
- 1 large can of crushed pineapple with light syrup
- 1 large can of chunk pineapple with light syrup
- 1 small can of apricot nectar
- Cherries (enough to add color)
- Small cans of pineapple juice (add if mixture is too thick)
- 1 large box of vanilla pudding mix (the one that you cook)

DIRECTIONS

Pour pears, peaches, and chunk pineapple into colander and save juice. Chip up fruit in bite-size pieces. Bring pudding and juice to a boil until the mixture thickens. If mixture is too thick, add some pineapple juice. Pour mixture immediately over fruit, and place in refrigerator to chill. Other perishable fruits (i.e., bananas, strawberries, etc.) may be added at time of serving.
